

# My carers wear PPE

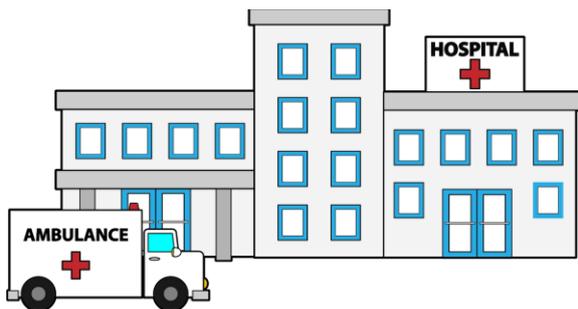

There is a nasty virus going around.

The virus is called Coronavirus. Some people call it COVID-19.

When people are very close to each other or touch each other, they could give each other the virus.

The virus causes cough, fever and trouble breathing. Sometimes it can get very serious and people end up in hospital.

My carers want to help me and keep me safe, happy and healthy.

Sometimes they need to come close to me or touch me.

## My carers wear PPE

To keep me safe from the virus, my carers might wear a plastic apron.

My carers might also wear gloves to keep me safe from the virus.

My carers might also wear a mask, to make sure I am safe from the virus.

My carers might look funny wearing all those things but it is because they care about me and they don't want me to get the virus.
