

On the **tenth** day of **Christmas** Sensation**ALL** gave to me...

A tree Decoration

Have you got your tree up yet?

Follow our instructions to make some easy tree ornaments to decorate your home.

What you need:

To make the tree:

- Craft paper (any colour) or Christmas wrapping paper
- String or ribbon
- A ruler
- Scissors
- Pencil

For decorations:

- Sequins
 - Pom poms (small)
 - coloured pens or paints
 - beads or sticky gems
 - Glue Stick
- Whatever you have at home!

Step 1:

Cut 4 circles from the paper you are using.
One that measures 10cm, one 8cm, one 6cm and one 4cm wide.
(*Tip; a set of round cookie cutters make good templates!*)

Step 2:

Take each circle and fold as shown in these pictures.

Fold in half

Fold again to make quarters

Open it up to fold 2 opposite quarters in half again

It should look like this

Now your circles should look like this

Step 3:

Assemble the tree

Measure a piece of string or ribbon 40cm long

Tie the 2 ends of the string or ribbon together

Snip off the tip of each folded circle

This will make a small hole to thread the string through

Take the largest circle and thread it onto the string so the knot is on the bottom.

Tie another knot to secure the circle on the string

Repeat with all the circles in order of largest to smallest. It should then look like this.

Step 4:

Decorate your tree!

Do whatever you like - add stickers, glitter, glue on sequins, colour or paint.

Then top your tree with a star or a bead.

Now use the string loop to hang it on your Christmas tree.
